SILVER SERVICE

tadians by the Citizens of Indians.

New York, Sept. 21.—Gov. Matthews,
of Indiana, and the party of distinguished citizens who accompanied him to this city for the purpose of presenting a silver service and incrary to the battleship Indiana, boarded the United States dispatch boat Dolphin off West Thirty-fourth street shortly after 10 o'clock Monday morning The party was joined by a number of New Yorkers, who were former Indiana citizens, and by officials who were to take part in the programme, and other prominent persons. Ex-President Har-rison and Mex Harrison were among the number. The Dolphin was late in getting away, owing to the late arrival of Mr. and Mrs. Harrison.

Capt. Evans received his visitors a

the gangway of the Indiana.

The guests took a good look Uncle Sam's best fighting ship and declare! her worthy to carry the fiame Ind aoa. The serv ces were brief and consisted

in the presentation of the service by Gov. Marthews in behalf of the state of which he is the chief executive and short speeches by ex-President Harrison and the representatives of the navy department. After the ecremony the guests were given an excursion on the Dolphin to West Point.

Previous to making his presentation speech, Gov. Matthews handed Capt Evans the following formal letter.of

INDIANAPOLIS, Ind., Sept. 21, 1896. Capt Robley Evans, Commanding U

S. Pattleship Indiana: Dear Sir, -In the name of the committee selected to represent the subscribers to the purchase fund, I have the honor herewith formally to present through you to the battleship Indiana. the silver service and the collection of books by Indiana authors, which are now placed in your possession.

The silver service is a gift to the ship for the use of all the commissioned officers who shall serve in her, and it is the desire of the committee that when any mess of commissioned officers of the Indiana shall give un entertain-ment it shall be entitled to use all or any part of the service for such occa-

I have the honor to be, very truly ours, CLAUDE MATTHEWS.

THE DERVISHES

Outwitted by the English Soudan Expedition-They Are Placed Between Two

LONDON, Sept. 21. -The correspondent of the Daily News, who is with the Soudan expedition, telegraphs that in the attack on El Hafir, the Dervishes were outwitted. They all advanced on land to meet the troops, thus permitting the gunboats to slip past the town, sink one of their steamers and hurry on to Dongola. When the Dervishes saw this move they turned and tried to overtake the gunboats and save Dongola, but the land forces of the expedition headed them off.

The Staffordshire regiment will follow the gunboats to Dongola, and thus the Dervishes will be placed between two fires.

Wad Bisharr, the leader of the Dervishes, was wounded at El Hafir. He was carried outside the range of the guns. A prisoner states that when he saw that he was defeated he exclaimed: "Allah is against me."

TOWN FLOODED.

of miles southeast of town, Sunday afternoon, flooded the town three or four feet, and run over the floors in the First national bank and sev n or eight of the leading business houses, filling all cellars and completely covering the Union Pacific tracks. The rush of water down through town was so sudden that no time was left for getting merchandise out of the cellars. Tim Kinney & Co.'s large double two-story business house is undermined by the water and in danger of collapsing at any time. The damage it was thought, will be \$50,000. No lives were lost.

Bryan on Pensions.

Mr. Bryan's language in his Albany speech, about the old soldiers and the free coinage of silver, should be read carefully by the 970,000 pensioners who look to the federal government for a part or the whole of their support:

"I notice that one of our opponents the other day said that the old soldiers would be opposed to free coinage. They gave the impression that the financiers are very much interested in maintaining a gold standard for the benefit of the soldiers. But, my friends, these men forget that all of the old soldiers lived during the war, and that during the war the soldiers knew that the financiers made their bonds payable in do not believe that the soldiers who are willing to offer their lives, if need be, in behalf of their country are today going to join in a conspiracy to enslave 70,000,000 of free people by fettering them to a gold standard." Mr. Bryan's language here is as dem-

agogic and as carefully intended to stir up "class" hatred as is habitual with him; and it is even more devoid of sense. The "conspiracy to enslave millions of free people" exists in Mr. Bryan's mind and some other receptacles of invented facts and emotional language. The 970,000 pensioners can see with their own eyes the attempt now making by Mr. Bryan and his friends to scale down pensions by making them payable in debased money.—New York Sun (Dem.).

No Sale For Bonds

The Cincinnati Commercial Tribune points out that municipal bonds amounting to almost \$12,000,000, put upon the market from July 20 to Aug. 20, have failed of sale because of the free silver agitation. Every peany of this \$12,000,-000 would have been paid out in the employ of labor, for all were improvement bonds. In most cases there were no bids, while in others the bonds were rejected after bids were put in. That is what Bryan's nomination has done so far for the workingman.

FALL OF PRICES

And Library Presented to the Battleship Not Due to Appreciation of Gold, But to Chenper Cost of Producti

Hon. David A. Wells, author of "Recent Economic Changes," and the greatest American authority on the cause of falling prices, has a full page article on this subject in the New York Tribune of September 7. He finds that there has been a universal fall in prices, averaging 30 or 40 per cent., since 1873, but that it is only in this country that the fall is attributed to the demonetization of silver. Continuing, he says in part:

Granting, as every intelligent person must, that the recent universal decline in prices cannot be due to any local agency, but must be attributed to some universal influence, it is claimed that such an influence is to be found in an appreciation in the value or purchasing power of gold, owing to its limited and insufficient supply, and also that this decline in prices followed the so-called demonetization of silver in some countries, and the closing of the mints in other countries to its coinage. The appreciation of gold, helped by

an alleged enforced scarcity of silver,

and a decline in price seem, therefore, to stand to each other in the relation of cause and effect, and the cause of the advocates of silver has accordingly at the outset much of plausibility. But plausibility is not proof, nor assumption truth, as is strikingly illustrated by the claim of Rev. Jasper, pastor of the First colored church in Richmond, Va., that "the sun do move," and the earth 'do stand still," and who has more of seeming facts in support of his faith than can be adduced by the advocates of the gold appreciation theory-for cannot everybody with eyes see the sun move up every morning in the east and move down every evening in the west? And if the earth moves 19 miles every second, as the astronomer bugs tell us, would not every movable thing fly off its surface as mud does from a revolving carriage wheel? And as nothing does fly off, is it not certain that the earth stands still?

Investigation in the case of Rev. Jasper and the advocates of the gold appreciation theory will, however, lead to different conclusions. It is to be noted. in the first place, that the advocates of the latter theory, in stating what they assert to be the truth, never express themselves other than generally, in all that has been written or spoken in support of the gold theory on either side of the Atlantic.

No one has ever been able to name a single commodity that has notably declined in price within the last 30 years and satisfactorily proved, or even attempted to prove, that such decline was due to the appreciation of gold. And the reason for such default is that it cannot be done.

On the other hand, not a single com modity that has notably declined in price within this time can be named in respect to which clear, abundant and specific evidence cannot be adduced in proof that this decline has been due to decreased cost of production or distribution or to changes in supply or demand occasioned by wholly fortuitous circumstances.

Nobody, furthermore, has ever risen to explain the motive which has impelled the honest sellers of merchandise all over the world during the last 25 years to take lower prices for their goods in the face of an unexampled A Cloudburst Causes Destruction to Property at Rock Springs, Wyo.

Rock Springs, Wyo., Sept. 21.—A cloudburst up in the canyon, a couple of miles canyon, a couple of miles canyon, a couple of diminished demand. Has anyone ever attempted to explain how it has happened that during the recent period of the fall of prices the world's stock of of the fall of prices the world's stock of money, and especially of silver, has been constantly increasing.

P. WARD,
Real Estate and Loan Agent,
Second St., opp. Union Depot. Marietta, O

constantly increasing. Is it not plain that a phenomenal decline of prices in two parts of the world with entirely different monetary conditions, must have had other causes than a demonetization of silver in the United States, which took place, if it ever did. a comparatively short time ago (repeal of the Sherman act in 1893), and which has not prevented nearly \$600,000,000 of silver credit money from circulating

in the country at its full nominal value? That the price of labor measured in gold has not declined, but increased in a marked degree everywhere in the civilized world during the last quarter of a century, has been already commented on; hence, if the purchasing power of gold has increased during this period a given amount of it would have purchased more labor and not less, or what is the same thing, wages would have fallen,

which they have not done. Measured by the price of labor, gold has unquestionably depreciated, and re cent careful examination. indicate that the ratio of its decline has been from 100 in 1873 to 83 in 1893. Measured also by the decline in the rate of interest on such established gold-paying securities gold, and left the soldier to offer his life such established gold-paying securities upon the battlefield. More than that, I as Eritish consols, the ratio has been from 100 in 1870 to 75 in in 1896. Can anybody suggest a better measure for testing this issue?

Has any one ever endeavored to explain how an appreciation of gold has reduced the cost of railroad and water transportation to the extent of more than 75 per cent; within the last 20 years. although the wages of employes have notably advanced during the same period?

If, on the other hand, these reductions were caused by the suppression of the free coinage of silver, will not a reversion of policy enable the railroads to advance their freight rates and rob the people, as will be claimed, by exacting 50 per cent. more than at present? And will not some supplementary provisions to the free-coinage act be neces sary to prevent their so doing?

.... We cannot by law fix the value of either metal or coin or of any of the articles that enter into the wants of life. The great law of demand and sup-
